

# SENIOR CELEBRATIONS!

May 13, 2022

Dear MUSD Parents,

These seniors are using their passion for science to help others!

**Sequyai "Coiya" Crockett-Hogan** has her sights set on Central Arizona College and the University of Arizona to begin her work toward a Bachelor of Science in Nursing, and ultimately, a Doctorate in Nursing and Herbal Medicine. Certifications earned through CAVIT have inspired her to pursue an initial career as a medical assistant while working toward degrees to become a Naturopathic Physician. Coiya aspires to start her own medical practice one day.

**Faith Chappell** will also use her CAVIT experience to work as a medical assistant while attending Central Arizona College, after which, she plans to transfer to the University of Arizona to complete a degree in Nursing. Her career goals are simple and profound: "to help and heal."

**Carlos Pino** will attend Northern Arizona University to study Biology. Following his passion for a career in Forensic Science, he will apply his skills to find truth and seek justice through scientific investigation.

**Molly Auer** will study Statistics and Data Science at the University of Arizona. Ultimately, she aims to analyze global health issues and help to create solutions. She imagines herself in a career within a government organization like the World Health Organization.

**Nova Vogel** will attend the University of Arizona to earn a degree in Veterinary Science. She has already been offered employment as a Veterinary Assistant, a relationship built during her veterinary externship. Her ultimate career goal is to become a Small Animal Veterinarian. Nova recently shared her realization: "now it is no longer my dream, but my plan."

Harnessing the power of science to help and heal, these graduates' talents will undoubtedly make the world a better place.

Thank you for choosing MUSD, where great futures begin.

Sincerely,

Dr. Tracey Lopeman, Superintendent  
Maricopa Unified School District
